

Patent Application
Attorney Docket No. PC9898B

REMARKS

This amendment is to fully comply with the requirements for making a domestic priority claim in the above-identified application. The ADS submitted with the filing of this divisional application cited the parent application, but inadvertently omitted reference to the provisional application from which the parent derives and claims priority. Applicants maintain that the amendment of the specification to include the priority claim is timely under 37 CFR 1. and raises no issue of new matter. Accordingly, applicants respectfully request entry of the amendment.

A favorable response is earnestly solicited.

Respectfully submitted,

RECEIVED
